Parks and Recreation

CONSTRUCTION  
COST  
Approx. \$971,000

COMPLETION  
2010

## Project Description:

The project consisted of the development and implementation of 2 multi-use trails around the perimeter of Lexington's Shillito Park – the Shillito Trail and the Lafayette Trail. The scope included approximately 2.4 miles of 8'-10' asphalt trail, grading, piping and a 50' prefabricated steel bridge.

Existing significant features were worked around and preserved such as a large Pin Oak and several pine trees. Preserving these trees became a topic of contention within some urban forestry organizations such as the Lexington Tree Board.

The project was a popular project even during construction where citizens were repeatedly seen walking and biking on the unpaved trail bed.

*Project completed while with M2D design group, Lexington, KY.*
